PROJECTS

Student Management System | ASP.NET Core MVC

- Developed a Student Management System using ASP.NET Core MVC, EF Core (Code-First), and SQL Server with a clean, scalable architecture.
- Implemented role-based access control with ASP.NET Core Identity for Admin, Teacher, and Student roles, including custom permissions and validation rules.
- Applied Unit of Work and Generic Repository patterns, enhanced UX with AJAX and SweetAlert2, and optimized performance using stored procedures and pagination.

Library Management System | ASP.NET Web API <https://github.com/amrelghanam/Library-Management-System>

- Built a Library Management System using .NET Web API with clean Architecture and Minimal APIs.
- Implemented CRUD operations with EF Core and SQL Server, and secured the API.
- Applied Generic Repository Pattern, Unit of Work, and global response handling for clean and maintainable code.

EXPERIENCE

Backend .NET Intern | NDS, Egypt Present

- Implemented **Clean Architecture** and the Specification Pattern for a well-structured codebase.
- Secured the application with JWT-based authentication.

Instructor | Pyramakerz 08/2025 – Present

- Provided training and mentorship to over **500** students.
- Supported multiple schools, including Rajac International Language School, as a STEAM instructor.
